Directors' Report

31 March 2024

The directors present their report on Sun Pharmaceutical Industries (Australia) Pty Ltd for the financial year ended 31 March 2024.

1. General information

Information on directors

The names of each person who has been a director during the year and to the date of this report are:

Akshay Sethi

Sunil Ajmera

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

Principal activities

The principal activity of Sun Pharmaceutical Industries (Australia) Pty Ltd during the financial year was growing and harvesting poppy crops (straw and seeds) in La Trobe, Tasmania using farmers' agricultural land and manufacturing of opiate products which are used in the manufacturing of opiate products from Port Fairy plant in Victoria.

Sun Pharmaceutical Industries (Australia) Pty Ltd is a wholly owned subsidiary of Sun Pharma Holdings, Mauritius and is integrated in the consolidated financial statements of Sun Pharmaceutical Industries Limited, Mumbai, India.

No significant changes in the nature of the Company's activity occurred during the financial year.

2. Operating results and review of operations for the year

Operating results

The loss of the Company after providing for income tax amounted to \$ (13,561,804) (2023: \$ (11,518,982)).

Dividends paid or recommended

No dividends were paid or declared since the start of the financial year. No recommendation for payment of dividends has been made.

3. Other items

Significant changes in state of affairs

The following significant changes in the state of affairs of the Company occurred during the financial year:

During the year, the company issued AUD \$30,000,000 to Sun Pharma (Netherlands) B.V. by way of redeemable preference shares with effect from 6 March 2024 (refer note 19). Funds received were utilised to extinguish external bank finance (refer note 16).

During the financial year the Cannabis Biomass Extractor Capital Project neared completion with \$2,371,359 being capitalised at year end. This extractor will service a new revenue stream of the company to service the supply and Toll Processing agreement for Cannabis Biomass Extraction. Production commenced soon after year end in 31 March 2024.

Sun Pharmaceutical Industries (Australia) Pty Ltd

ABN 64 130 119 603

Directors' Report

31 March 2024

3. Other items

Events after the reporting date

No matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the Company, the results of those operations or the state of affairs of the Company in future financial years.

Future developments and results

Likely developments in the operations of the Company and the expected results of those operations in future financial years have not been included in this report as the inclusion of such information is likely to result in unreasonable prejudice to the Company.

Environmental issues

The Company's operations are not regulated by any significant environmental regulations under a law of the Commonwealth or of a state or territory of Australia.

Indemnification and insurance of officers and auditors

No indemnities have been given or insurance premiums paid, during or since the end of the financial year, for any person who is or has been an officer or auditor of Sun Pharmaceutical Industries (Australia) Pty Ltd .

Auditor's independence declaration

The lead auditor's independence declaration in accordance with section 307C of the *Corporations Act 2001*, for the year ended 31 March 2024 has been received and can be found on page 3 of the financial report.

Signed in accordance with a resolution of the Board of Directors:

Director:

Dated this day of 2024

Sun Pharmaceutical Industries (Australia) Pty Ltd

ABN 64 130 119 603

Auditor's Independence Declaration under Section 307C of the Corporations Act 2001 to the Directors of Sun Pharmaceutical Industries (Australia) Pty Ltd

I declare that, to the best of my knowledge and belief, during the year ended 31 March 2024, there have been:

- (i) no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the audit.

Notes to the Financial Statements

For the Year Ended 31 March 2024

1 Basis of Preparation

The financial statements are general purpose financial statements that have been prepared in accordance with the Australian Accounting Standards - Simplified Disclosures and the *Corporations Act 2001*.

The financial statements have been prepared on an accruals basis and are based on historical costs modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

Material accounting policies adopted in the preparation of these financial statements are presented below and are consistent with prior reporting periods unless otherwise stated.

2 Change in Accounting Policy

AASB 2021-1 Amendments to AASB 101 Presentation of Financial Statements – Disclosure of Accounting Policies and Definition of Accounting Estimates

The Company has adopted the amendments to AASB 101 for the first time in the current year. The amendments change the requirements in AASB 101 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

These amendments have no effect on the measurement or presentation of any items in the financial statements of the Company but affect the disclosure of accounting policies of the Company.

3 Summary of Material Accounting Policies

(a) Revenue and other income

Revenue from contracts with customers

Generally the timing of the payment for sale of goods and rendering of services corresponds closely to the timing of satisfaction of the performance obligations, however where there is a difference, it will result in the recognition of a receivable, contract asset or contract liability.

None of the revenue streams of the Company have any significant financing terms as there is less than 12 months between receipt of funds and satisfaction of performance obligations.

Specific revenue streams

The revenue recognition policies for the principal revenue streams of the Company are:

Sale of goods

Revenue from the sale of goods is recognised upon transfer of control of the goods to the customer, usually upon delivery. This is deemed to be the point in time when risk and reward is transferred, performance obligations are met and there is no longer any ownership or effective control over the goods

Notes to the Financial Statements For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(a) Revenue and other income

Specific revenue streams

Interest

Interest revenue is recognised when it becomes receivable on a proportional basis taking into account the interest rates applicable to the financial assets.

Other income

Other income is recognised on an accruals basis when the Company is entitled to it.

Statement of financial position balances relating to revenue recognition

Contract assets and liabilities

Where the amounts billed to customers are based on the achievement of various milestones established in the contract, the amounts recognised as revenue in a given period do not necessarily coincide with the amounts billed to or certified by the customer.

When a performance obligation is satisfied by transferring a promised good or service to the customer before the customer pays consideration or the before payment is due, the Company presents the contract as a contract asset, unless the Company's rights to that amount of consideration are unconditional, in which case the Company recognises a receivable.

When an amount of consideration is received from a customer prior to the entity transferring a good or service to the customer, the Company presents the contract as a contract liability.

(b) Income tax

The tax expense recognised in the statement of profit or loss and other comprehensive income comprises current income tax expense plus deferred tax expense.

Current tax is the amount of income taxes payable (recoverable) in respect of the taxable profit (loss) for the year and is measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates and laws that have been enacted or substantively enacted by the end of the reporting period. Current tax liabilities (assets) are measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred tax is not provided for the following:

- The initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).
- Taxable temporary differences arising on the initial recognition of goodwill.
- Temporary differences related to investment in subsidiaries, associates and jointly controlled entities to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Notes to the Financial Statements

For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(b) Income tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and losses can be utilised.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset. During the current year and previous year, the company didn't recognise deferred tax assets in the financials due to the accumulating losses over the years, and management assessed that future taxable profits are not available to recover the asset.

Current and deferred tax is recognised as income or an expense and included in profit or loss for the period except where the tax arises from a transaction which is recognised in other comprehensive income or equity, in which case the tax is recognised in other comprehensive income or equity respectively.

(c) Inventories

Inventories consisting stock-in-trade are measured at the lower of cost and net realisable value. The cost of all categories of inventories is determined based on the weighted average method. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- Raw materials: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.
- Finished goods and work in progress: cost includes the cost of direct materials, direct labour and a proportion of manufacturing overheads based on the normal operating capacity but excluding borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and costs necessary to make the sale.

Since, the Company is engaged in growing and harvesting poppy crops (straws and seeds) from which several alkaloids (opiate products) are extracted and sold to the customers, the inventory is valued based on the eventual net alkaloid content which will be extracted from the poppy crops or straws. This calculation involves a certain degree of estimate and judgement on management's part for calculation of the net weights of alkaloids to be gained from the gross weights of the crops/straws, which is subject to change in the future periods.

(d) Property, plant and equipment

Each class of property, plant and equipment is carried at cost or fair value less, where applicable, any accumulated depreciation and impairment.

Land and buildings

Land and buildings are measured using the cost model.

Notes to the Financial Statements For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(d) Property, plant and equipment

Plant and equipment

Plant and equipment are measured using the cost model.

Depreciation

Property, plant and equipment, excluding freehold land, is depreciated on a straight-line basis over the asset's useful life to the Company, commencing when the asset is ready for use.

The depreciation rates used for each class of depreciable asset are shown below:

Fixed asset class	Depreciation rate
Buildings	15-30 years'
Plant and Equipment	6-30 years'
Furniture, Fixtures and Fittings	1-20 years'
Motor Vehicles	1-15 years'

The company, based on technical assessment made by management estimates, depreciates certain items of property plant and equipment over different useful lives that the general class of that particular property, plant and equipment. This is based on future life estimates, condition and location factors.

At the end of each annual reporting period, the depreciation method, useful life and residual value of each asset is reviewed. Any revisions are accounted for prospectively as a change in estimate.

Property plant and equipment is derecognised upon disposal or impaired when no future economic benefits are expected to arise from continued use. Any gain or loss on disposal of an item of property, plant and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss.

(e) Financial instruments

Financial instruments are recognised initially on the date that the Company becomes party to the contractual provisions of the instrument.

On initial recognition, all financial instruments are measured at fair value plus transaction costs (except for instruments measured at fair value through profit or loss where transaction costs are expensed as incurred)

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification

On initial recognition, the Company classifies its financial assets into the following categories, those measured at:

Notes to the Financial Statements

For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(e) Financial instruments

Financial assets

- amortised cost
- fair value through profit or loss - FVTPL
- fair value through other comprehensive income - equity instrument (FVOCI - equity)
- fair value through other comprehensive income - debt investments (FVOCI - debt)

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets.

Amortised cost

The Company's financial assets measured at amortised cost comprise trade and other receivables and cash and cash equivalents in the statement of financial position.

Subsequent to initial recognition, these assets are carried at amortised cost using the effective interest rate method less provision for impairment.

Interest income, foreign exchange gains or losses and impairment are recognised in profit or loss. Gain or loss on derecognition is recognised in profit or loss.

Impairment of financial assets

Impairment of financial assets is recognised on an expected credit loss (ECL) basis for the following assets:

- financial assets measured at amortised cost

When determining whether the credit risk of a financial assets has increased significant since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company uses the presumption that an asset which is more than 30 days past due has seen a significant increase in credit risk.

The Company uses the presumption that a financial asset is in default when:

- the other party is unlikely to pay its credit obligations to the Company in full, without recourse to the Company to actions such as realising security (if any is held); or
- the financial assets is more than 90 days past due.

Credit losses are measured as the present value of the difference between the cash flows due to the Company

Notes to the Financial Statements

For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(e) Financial instruments

Financial assets

in accordance with the contract and the cash flows expected to be received. This is applied using a probability weighted approach.

Financial liabilities

The Company measures all financial liabilities initially at fair value less transaction costs, subsequently financial liabilities are measured at amortised cost using the effective interest rate method.

The financial liabilities of the Company comprise trade payables, bank and other loans and lease liabilities.

(f) Impairment of non-financial assets

At the end of each reporting period the Company determines whether there is evidence of an impairment indicator for non-financial assets.

Where an indicator exists and regardless for indefinite life intangible assets and intangible assets not yet available for use, the recoverable amount of the asset is estimated.

Where assets do not operate independently of other assets, the recoverable amount of the relevant cash-generating unit (CGU) is estimated.

The recoverable amount of an asset or CGU is the higher of the fair value less costs of disposal and the value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Where the recoverable amount is less than the carrying amount, an impairment loss is recognised in profit or loss.

Reversal indicators are considered in subsequent periods for all assets which have suffered an impairment loss.

(g) Intangible assets

Intangible assets that are acquired by the Company and that have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses, if any. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Software for internal use, which is primarily acquired from third-party vendors, including consultancy charges for implementing the software, is capitalized. Subsequent costs are recognised in the statement of profit and loss as incurred. The capitalized costs are amortised over the residual useful life of the software.

Notes to the Financial Statements For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(g) Intangible assets

Amortisation

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, from the date that they are available for use.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

The estimated useful lives are as follows:

<u>Asset Category</u>	<u>No. of years</u>
Computer Software	5-6
Technical KnowHow	10

(h) Leases

At inception of a contract, the Company assesses whether a lease exists.- i.e. does the contract convey the right to control the use of an identified asset for a period of time in exchange for consideration.

This involves an assessment of whether :

The control involves the use of an identified asset - this may be explicitly or implicitly identified within the agreement. if the supplier has a substantive substitution right then there is no identified asset.

The company has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use.

The company has the right to direct the use of the asset i.e. decision making rights in relation to changing how and for what purposes the asset is used.

Lessee accounting

The non-lease components included in the lease agreement have been separated and are recognised as an expense as incurred.

The Company has chosen not to apply AASB 16 to leases of intangible assets.

At the lease commencement, the Company recognises a right-of-use asset and associated lease liability for the lease term. The lease term includes extension periods where the Company believes it is reasonably certain that the option will be exercised.

The right-of-use asset is measured using the cost model where cost on initial recognition comprises of the lease liability, initial direct costs, prepaid lease payments, estimated cost of removal and restoration less any lease incentives received.

The right-of-use asset is depreciated over the lease term on a straight line basis and assessed for impairment

Notes to the Financial Statements

For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(h) Leases

in accordance with the impairment of assets accounting policy.

The lease liability is initially measured at the present value of the remaining lease payments at the commencement of the lease. The discount rate is the rate implicit in the lease, however where this cannot be readily determined then the Company's incremental borrowing rate is used.

Subsequent to initial recognition, the lease liability is measured at amortised cost using the effective interest rate method. The lease liability is remeasured whether there is a lease modification, change in estimate of the lease term or index upon which the lease payments are based (e.g. CPI) or a change in the Company's assessment of lease term.

Where the lease liability is remeasured, the right-of-use asset is adjusted to reflect the remeasurement or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Exceptions to lease accounting

The Company has elected to apply the exceptions to lease accounting for both short-term leases (i.e. leases with a term of less than or equal to 12 months) and leases of low-value assets. The Company recognises the payments associated with these leases as an expense on a straight-line basis over the lease term.

(i) Employee benefits

Provision is made for the Company's liability for employee benefits, those benefits that are expected to be wholly settled within one year have been measured at the amounts expected to be paid when the liability is settled.

Employee benefits expected to be settled more than one year after the end of the reporting period have been measured at the present value of the estimated future cash outflows to be made for those benefits. In determining the liability, consideration is given to employee wage increases and the probability that the employee may satisfy vesting requirements. Cashflows are discounted using market yields on high quality corporate bond rates incorporating bonds rated AAA or AA by credit agencies, with terms to maturity that match the expected timing of cashflows. Changes in the measurement of the liability are recognised in profit or loss.

(j) Provisions

Provisions are recognised when the Company has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

Provisions are measured at the present value of management's best estimate of the outflow required to settle the obligation at the end of the reporting period. The discount rate used is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the unwinding of the discount is taken to finance costs in the statement of profit or loss and other comprehensive income.

Provisions recognised represent the best estimate of the amounts required to settle the obligation at the end of the reporting period.

Notes to the Financial Statements

For the Year Ended 31 March 2024

3 Summary of Material Accounting Policies

(k) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options which vest immediately are recognised as a deduction from equity, net of any tax effects.

Preference share capital is classified as equity if it is non-redeemable or redeemable only at the company's option, and any dividends are discretionary.

Preference share capital is classified as financial liability if it is redeemable on a specific date or at the option of the shareholders, or if dividend payments are not discretionary.

(l) Foreign currency transactions and balances

Transaction and balances

Foreign currency transactions are recorded at the spot rate on the date of the transaction.

At the end of the reporting period:

- Foreign currency monetary items are translated using the closing rate;
- Non-monetary items that are measured at historical cost are translated using the exchange rate at the date of the transaction; and
- Non-monetary items that are measured at fair value are translated using the rate at the date when fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition or in prior reporting periods are recognised through profit or loss, except where they relate to an item of other comprehensive income or whether they are deferred in equity as qualifying hedges.

4 Critical Accounting Estimates and Judgments

The directors make estimates and judgements during the preparation of these financial statements regarding assumptions about current and future events affecting transactions and balances.

These estimates and judgements are based on the best information available at the time of preparing the financial statements, however as additional information is known then the actual results may differ from the estimates.

The significant estimates and judgements made have been described below.

Key estimates - estimation of useful lives of assets

The company determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down

Notes to the Financial Statements

For the Year Ended 31 March 2024

4 Critical Accounting Estimates and Judgments

Key estimates - fair value of financial instruments

The Company has certain financial assets and liabilities which are measured at fair value. Where fair value has not been able to be determined based on quoted price, a valuation model has been used. The inputs to these models are observable, where possible, however these techniques involve significant estimates and therefore fair value of the instruments could be affected by changes in these assumptions and inputs.

Key estimates - employee benefit provisions

As described in the accounting policies, provisions are measured at management's best estimate of the expenditure required to settle the obligation at the end of the reporting period. These estimates are made taking into account a range of possible outcomes and will vary as further information is obtained.

Key estimates - provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the company policy regarding aged impairment, recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

Key judgments - Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the company considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Key judgments - Impairment of definite life intangible assets

The company assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the company and to particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates assumptions.

Notes to the Financial Statements For the Year Ended 31 March 2024

4 Critical Accounting Estimates and Judgments

Key judgements - Going concern

For the year ended 31 March 2024, the Company reported a loss of \$13,561,804 (2023 Loss: \$11,518,982), net overdraft was negative \$12,941,827 (2023: \$2,267,434 overdraft) and a short term bank borrowings of \$nil (2023: \$30,000,000).

Despite the above circumstances, The financial report has been prepared on the basis that the entity can continue to meet its commitments as and when they fall due. In arriving at this position the Directors has given regard to the following;

- Loss contributed to by \$3,980,103 (non-cash) depreciation and amortisation charges. In management's view, these expenses do not impeded the settlement of company financial obligations;
- Careful cash flow management through and intended return to profitability from 2026 through the implementation of board approved multi year strategic plan and budgets which will entail incremented market share, cost reductions and development of new products including cannabis;
- Research and development which has seen new product development to manufacture from Thebaine and Oripavine controlled substances;
- Belief that the company retains ongoing support of the wider related party company group as evidenced through issuing of \$30,000,000 preference shares during the year to facilitate settlement of external third party borrowings. Further, the company has loan agreements with related party entity Sun Pharma (Netherlands) B.V executed on 4 January 2021 unsecured to a maximum drawdown of \$50,000,000 AUD, another \$100,000,000 AUD unsecured loan facility executed on 7 June 2021 and another \$15,000,000 USD unsecured loan facility executed on 6 May 2022. As at reporting date, \$19,795,160 AUD of these facilities were drawn down.
- Receipt of letter of support from ultimate parent entity of the Group (Sun Pharmaceutical Industries Limited) on 15 May 2024 confirming intention to provide appropriate financial support for at least until 31st March 2025 and, at the date of signing of this report directors are confident of receiving extension as required, to ensure all financial commitments of the company can be met as and when due.
- In addition, the company has a significant undrawn overdraft facility from Citi Bank, Australia available to the company.

The Directors believes that at the date of the signing of the financial statements there are reasonable grounds to believe that, having regard to the matters set out above, the Group will be able to raise sufficient funds to meet its obligations as and when they fall due and continue to proceed with objectives for the coming twelve month period.

Should the Director not maintain ongoing support from Related party financiers and achieve the matters set out above, there may be a uncertainty on whether the company will be able to continue as a going concern.

Sun Pharmaceutical Industries (Australia) Pty Ltd - 31 March 2024

Directors' Declaration

The directors of the Company declare that:

1. The financial statements and notes, as set out on pages 4 to 30, are in accordance with the *Corporations Act 2001* and:
 - a. comply with Australian Accounting Standards - Simplified Disclosure Standard; and
 - b. give a true and fair view of the financial position as at 31 March 2024 and of the performance for the year ended on that date of the Company.
2. In the directors' opinion, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors.

Director

Akshay Sethi

Sun Pharmaceutical Industries (Australia) Pty Ltd

Independent Audit Report to the members of Sun Pharmaceutical Industries (Australia) Pty Ltd

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Sun Pharmaceutical Industries (Australia) Pty Ltd (the Company), which comprises the statement of financial position as at 31 March 2024, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Company is in accordance with the *Corporations Act 2001*, including:

- (i) giving a true and fair view of the Company's financial position as at 31 March 2024 and of its financial performance for the year ended; and
- (ii) complying with Australian Accounting Standards - Simplified Disclosures and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards - Simplified Disclosures and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Sun Pharmaceutical Industries (Australia) Pty Ltd

Independent Audit Report to the members of Sun Pharmaceutical Industries (Australia) Pty Ltd

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.
