

Sun Pharma UK Limited Carbon Reduction Plan

Supplier name: Sun Pharma UK Limited

Publication date: 01/07/2024

Commitment to achieving Net Zero

Sun Pharma UK Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Reporting period: 01/04/2022 - 31/03/2023	
Additional Details relating to the Baseline Emissions calculations.	
As this is the first year of reporting emissions our Baseline Emissions Footprint is the same as our Current Emissions Reporting year.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.00
Scope 2	12.22
Scope 3 (Included Sources)	1,005.04
Total Emissions	1,017.25

Current Emissions Reporting

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	12.22
Scope 3 (Included Sources)	1,005.04
Total Emissions	1,017.25

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We commit to reducing scope 1, 2 and this subset of scope 3 emissions by 42% by 2030 from a 2023 baseline.

We commit to reducing scope 1, 2 and this subset of scope 3 emissions by 90% by the net zero target year 2045 from a 2023 baseline.

These targets can be seen in the graph below:

Reduction Targets tCO₂e

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The main source of energy consumption is the serviced office premises in Stockley Park. We had made efforts to reduce energy consumption by regular portable appliance testing to ensure that excessive energy consumption is restricted due to any faulty appliances encouraging employees to power-off instruments when these are not in use. We will also jointly explore the possibility with Stockley Park management of switching to more efficient LED lights within office premises. We recommend employees to consider purchasing Electric Vehicles (EV's) for emission reduction in employee-owned vehicles. We have also implemented a recycling policy for office waste.

In the future we plan to implement further measures such as:

Sustainable Freight and Logistics

- Prioritise sea freight over air freight for international inbound product shipments where feasible.
- Optimise freight routing and load consolidation to improve vehicle utilisation.
- Collaborate with logistics providers to identify opportunities for using alternative fuels and technologies.

Business Travel Reduction

- Implement a virtual-first policy for meetings and conferences where appropriate.
- Encourage the use of online collaboration tools to minimise the need for in-person travel.
- When travel is required, promote the use of lower-emission transportation modes like rail.

Sustainable Procurement

- Incorporate carbon emissions as a key criterion in business partner selection and contract renewals.
- Work with business partners to gather emissions data and identify reduction opportunities in the supply chain.
- Incentivise business partners to invest in decarbonisation initiatives through preferential purchasing agreements.

Employee Engagement Campaigns

- Educate employees on the company's carbon footprint and climate action initiatives.
- Encourage employees to adopt sustainable behaviours at work and home through incentive programs.
- Establish a "Green Team" to empower employees to identify and implement emissions reduction projects.

Transparent Reporting

- Calculate and publicly report our Scope 1, 2, and 3 emissions on an annual basis.
- Disclose progress against emissions reduction targets.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
